# FRC 2025 Game Analysis – Reefscape
*Team 2950 – The Devastators | Generated: 2026-04-14T23:07:50Z*

## Data Sources
  • team_years: .cache/statbotics/team_years_2025_*.json (3702 teams)
  • scoring model: oracle.py::HISTORICAL_GAMES
  • attribution_beta: blueprint/attribution_betas.py (32,442 matches)
  • rule_ablation: blueprint/rule_ablation.py (16,221 qual matches)
  • regionals: .cache/statbotics/team_years_2025_*.json (3702 records)

## 1. Game Overview
FRC 2025: Reefscape

Game pieces: coral + algae
Endgame: climb (12 pts)
Estimated winning score: 180 pts
Field obstacles: No
Shared/contested pieces: No

### Scoring Model
Scoring targets:
  • Reef Branch L4: Auto=7 | Teleop=7 (cap 84 pts)
  • Reef Branch L3: Auto=6 | Teleop=6 (cap 72 pts)
  • Reef Branch L2: Auto=4 | Teleop=4 (cap 48 pts)
  • Processor: Auto=0 | Teleop=6
*Source: oracle.py::HISTORICAL_GAMES*

## 2. Attribution β – Season Coupling Analysis
| Field | Value |
|-----|-----|
| Game | Reefscape |
| Prior β | 0.70 |
| Empirical β | 0.65 |
| 95% CI | 0.50–1.00 |
| Tuned on | 32,442 matches |

**Interpretation:** β=0.65 (prior=0.70) – seasons aligned closely with prior. Algae staging effects verified by kl26436 community analysis. 95% CI: (0.5, 1.0) on 32,442 matches.

## 3. Top Teams Analysis
*Source: .cache/statbotics/team_years_2025_*.json (3702 teams) | Sample: 3702 teams | [ELITE] threshold: EPA ≥ 69.2*

| Rank | Team | Name | EPA | Auto | Teleop | EG | W-L | Events | |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2056 | OP Robotics | 120.1 | 31.6 | 76.1 | 12.4 | 68-7 | 0 | [ELITE] ONT |
| 2 | 2910 | Jack in the Bot | 114.1 | 28.4 | 72.8 | 13.0 | 66-7 | 0 | [ELITE] PNW |
| 3 | 1323 | MadTown Robotics | 112.0 | 27.6 | 72.0 | 12.4 | 53-3 | 0 | [ELITE] CA |
| 4 | 1690 | Orbit | 107.7 | 32.5 | 63.5 | 11.7 | 62-9 | 0 | [ELITE] ISR |
| 5 | 1678 | Citrus Circuits | 105.8 | 27.0 | 66.6 | 12.2 | 57-8 | 0 | [ELITE] CA |
| 6 | 118 | Robonauts | 104.8 | 20.0 | 72.7 | 12.0 | 110-12 | 0 | [ELITE] FIT |
```

5. Regional / District Insights

Source: .cache/statbotics/team_years_2025_.json (3702 records)*

District	Teams	Mean EPA	Median EPA	Top Team	Top EPA
----- ----- ----- ----- -----					
ISR	62	41.1	39.3	#1690	107.7
ONT	130	38.7	33.8	#2056	120.1

NE	190	37.0	33.7	#190	86.0
PNW	132	36.9	31.5	#2910	114.1
FIN	71	35.1	30.2	#7457	96.4
FMA	139	33.2	26.0	#341	90.6
CHS	98	32.2	28.5	#422	95.6
FIM	525	31.8	26.4	#4391	85.4
FIT	187	29.3	22.8	#118	104.8
PCH	74	28.9	23.6	#1771	88.4
FSC	34	28.4	24.1	#4451	69.5
FNC	86	27.7	22.6	#9496	78.0
INDEPENDENT	1959	27.5	22.4	#1323	112.0
FCH	13	27.5	20.5	#8592	67.4

6. Strategic Takeaways

1. Moderate coupling ($\beta=0.65$): individual EPA remains the strongest predictor, but alliance composition still adds ~35% of variance.
2. Top team: 2056 (OP Robotics) with EPA=120.1. 25 teams in [ELITE] tier (top 5% EPA).
3. Auto scoring is load-bearing: top team earns 26% of EPA in auto. Teams that skip auto are giving up structural EPA.
4. Most load-bearing Oracle rule: all ($\Delta\text{conf}=+0.385$ vs baseline confidence 0.88). Architectural accuracy baseline: n/a.
5. 12 of 15 Oracle rules show statistically significant confidence contribution. Statbotics win-pred accuracy: 77.9% (95% CI: 77.2%–78.5%, n=16,221 qual matches).
6. Strongest district by mean EPA: isr (mean=41.1, n=62 teams). Top team in district: #1690 (EPA=107.7).
7. Watch next season: game designers often swing β from high→low in alternating cycles. If 2025 was high-coupling, expect more independent scoring in the next game.

Notes: All takeaways are data-grounded from cache.
